

# Prevention Clean

A prevention clean can help avoid the spread of COVID-19 and other communicable diseases keeping your staff and community safe.

## The Service

My Pathway Facility Services is offering prevention cleans to mitigate the risk of COVID-19 in your commercial property or workplace. The service includes a fogging procedure or a surface cleaning method using safe and effective disinfectants.

Safe, hospital-grade disinfectant that is effective against many diseases including human coronavirus microorganisms

Fogging technique reaches all indoor spaces, including non-accessible areas

Spray and wipe method used for frequently touched surfaces such as light switches, door handles and lifts

Pressure spraying treatment can be applied to external areas

## We make it simple

We know your property and how you like things done. We'll provide the same trusted service you've come to expect and can add prevention cleans to your existing facility services schedule.
